

FOOTBALL WEB SITES

Digital Ink build sports web sites. We build web sites for football and rugby clubs, including Charlton Athletic and London Wasps. We understand the needs of clubs as we have been in the business 9 years. We give clubs the tools they need to update their own web site themselves. Our web sites allow you to update and manage every page of content. You can add stories, match reports, pictures, audio and more.

Our web sites can be set up to sell merchandise, tickets, season tickets, memberships, even advertising.

We also understand the needs of supporters. Our latest sites easily exceed the growing legal requirements regarding disabled supporters. We do not throw away last season's news, squad or fixtures; so the site builds into a searchable encyclopaedia on your club, that is always going to have something to entertain and spread your message.

If you are interested in maximising your sales on the internet contact us on the number below or visit our website at www.digital-ink.co.uk.
